\$2.00 per Year. 5 cents a copy

Mr. Rodd Pays Visit To Fish & Game.

Mr. R. T. Rodd, director of fisheries for Alberta met with a number of members of the Didsbury Fish & Game Association Friday afternoon last to discuss the feasibility of establishing rearing-ponds for trout on Bear Creek, a tributary of the Fallen Timber. Mr. Rodd recently inspected the creek and recommended building a series of small dams and promised that if the work was done this fall he would supply fry to stock the ponds next spring.

The association decided to accept Mr. Rodd's recommendation and work will commence directly after harvest.

Mr. Rodd reported having inspected lakes east of town with the idea of stocking with fish. He stated that Kiever Lake would be suitable for perch and possibly pike and promised that the lake would be stocked in the near future.

The local association are alive to the possibility of preserving the fishing in the streams to the west and the larger the membership, the more work can be done. See the president, Mr. Hugh Lee or Mr. Geo. Julien and hand in your membership fee.

Didsbury Dairy Wins Prizes

The quality of the herd kept by Didsbury Dairy is emphasized by their winnings at Didsbury Fair last week. They won a first and a second in the purebred Holstein class and a second and a third in the purebred Jersey class. There was a large entry in both classes.

Clever Police Work.

Mr. John Thompson & Son, of the Corner Garage, three miles east of Olds have real cause to thank very highly of our western police.

Three months ago a clever thief visited the Thompson Garage and was interested in a new Dodge sedan. He visited the garage on two or three occasions in company with a young lady whom he claimed as his wife. During the visitations they became more intimate with the proprietor and gained his confidence to the extent that they were allowed to drive the car on pretence of being cash purchasers of the sedan. The gasoline tank holding a liberal supply of fuel and with a refilling of oil, the pair, under carefully prepared plans made a getaway and were gone hours before Mr. Thompson had any suspicion that he had been dealing with real "live-wire" crooks.

The case was reported to the police the following morning and nothing was heard of the car until last Saturday when Mr. Thompson was notified that his car had been located at Pouce Coupe, B.C. It is a clear case of the diligence of the police, for when the car was found it was housed in a dog-out. It was in good condition with the four wheels off, mounted on a trestle and containing a large stock of groceries. The hole-in-the-ground was a well concealed hiding place and the mystery is how the police located the cache of the couple, apparently professionals in the stealing business who, we are given to understand, were apprehended at the time the sedan was discovered.

The owners of the stolen Dodge have been given authority to make the trip for its return which will be taken advantage of in a few days.

—OLDS GAZETTE

LOCAL & GENERAL

Mr. Jack Currie left this week for a vacation trip to Saskatchewan.

Mr. Bill McFarquhar visited his parents at Calgary Sunday.

Mrs. Madames McCoy and Hilary were Edmonton visitors this week.

Mr. Ed. Ford returned Friday from a holiday at Banff and other park points.

Mrs. A. G. Stader who has been vacationing at Sylvan Lake returned home Sunday.

Mr. M. Cressman and family, of Staveland are visiting relatives here this week.

Owing to holiday arrangements, United Church services will not be held at Westcott or Westerdale on Sunday, August 9th.

Mr. and Mrs. C. H. Adshad left Monday for a vacation at Wyndell, B.C. where they will visit at the home of Mrs. Adshad's parents.

Mr. Felix Boitnott left Wednesday for Roanoke, Virginia where he will visit his old home and relatives in the south.

Football this Saturday evening! Didsbury and Bowden in an exhibition game. Kick-off 7:30 p.m. Admission 25c.

Sermon subjects for August 9th at the Evangelical Church: Morning, 10:30, "The Purpose of Worship." Evening, 7:30, "The Fall of Jesus."

Messrs. E. G. Ranton and H. O. Tenjum spent a few days this week visiting at the Ranton cottage at south Cooking Lake, near Edmonton.

The play-off for the cup between Didsbury and Iricana will be played at Crossfield tomorrow evening (Friday). A large crowd of rooters will be going from here.

The golf competition has been delayed an account of the long grass on the course. The grass has now been cut, the links are in fair shape and the competition is proceeding.

The travel on the Calgary-Edmonton highway is very heavy each week-end. On Sunday evening a count of cars was made and 323 cars were noted on a trip from Calgary between 8 and 10 p.m.

Mr. A. R. Kendrick went to Sylvan Lake Sunday and returned with Mrs. Kendrick and Murray who have been spending a month at that resort. Misses Beatrice Kendrick and Winnie Stader will remain there another week.

Don't forget Olds Fair Wednesday next, August 12th. Its going to be a big day for there'll be something for everyone. The boys and girls Dairy Club will be a big feature over fifty calves being entered, while the display of other livestock and agricultural products will be large. Then there are the sports: horse races, foot races, football, baseball, horseshoe tournament, etc. The Kapel Shows with their merry-go-round and Ferris wheel will furnish thrills for the kiddies. Don't miss it, its going to be good. Remember entries for exhibits close Saturday, 10 p.m.

Wedding Shower.

Mr. and Mrs. John Dendrick were honored with a wedding shower at the home of Mr. and Mrs. K. Mullen Thursday evening last when seventy-five friends were present. The happy couple who are both very highly respected in the district were recipients of many beautiful and useful gifts. Lunch was served and a very enjoyable time was spent by everyone present.

Mr. and Mrs. Dendrick recently returned from their honeymoon trip. They drove down the Pacific coast to Oakland, California and thence across Arizona to Kansas, returning via Yellowstone Park. They travelled 7,600 miles on an eight weeks trip.

Charged With Abetting Grain Theft.

George W. Long was sentenced to one month in Lethbridge gaol and fined \$150 or a further two months in gaol by Judge Jackson at a special sitting of the district court in Macleod Saturday. The defendant, formerly an agent for a grain company at Nanton was charged with aiding and abetting A. P. O'Leary, of Cardston, formerly agent of the Alberta Wheat Pool elevator, in the theft of approximately 1,400 bushels of wheat. The wheat was an average in possession of the pool elevator at Nanton in December, 1927.

Long was formerly in charge of an elevator at Didsbury.

Ship Alberta Butter And Cheese to U.K.

Exports to the United Kingdom last month included a shipment of butter and cheese from Alberta which formed part of the cargo of the steamer Trojan Star. There were 5,519 boxes of butter and 500 boxes of cheese. Officials said this was the first export of this nature and would likely be followed by other shipments.

Didsbury Creamery has been manufacturing a large quantity of butter this last month for export trade and a large part of the above shipment was manufactured at this point.

Boys Break Into Hawkes' Store

Hawkes' Store was broken into early Tuesday morning and a quantity of canned goods, two cheap watches and flash lamps were stolen.

Constable Kercher saw the culprits crossing the railroad yard with their booty and gave chase, but they dropped the sack of goods and got away. About noon the same day he located and arrested them. They proved to be two boys, 15 and 17 years who gave the names of Robert and John Cronwell.

They were brought before Magistrate Phillipson and pleaded guilty, saying they stole because they were hungry. The older boy was committed for trial and the younger one will be dealt with by the juvenile court.

Cup Game Again Played To A Tie

An exciting finish was the feature of the cup final game played at Crossfield last Friday evening, when the game ended in a 9-9 tie. Didsbury initiated contributed a flock of errors and trailed behind, by 5 runs up to the last of the ninth when they got going and knocked Wilson out of the box. He was replaced by Anderson, who in turn gave way to Williams and when things had cleared Didsbury had scored 5 runs to tie up the game. Darkness prevented any more play. This is the second time these teams have played to a draw and another game is necessary to settle the argument.

On the play Iricana deserved to win as they outplayed Didsbury for most of the game. Joe Thompson on the mound for Didsbury, outpitched Wilson, but received poor support. The eastern team secured four unearned runs. The Iricana outfield turned in a sparkling game as Ed Hale, Gooder covering left for Didsbury.

Didsbury—Wynnan, 1b; Stauffer, 2b; Cook, ss; Gooder, lf; Thompson, p; Woodlock, c; Lee, 2b; Bercht, rf; Robinson, cf.

Iricana—Foster, rf; Young, lf; McCoy, 3b; Williams, ss and p; Bills, 2b; Black 1b; C. Stuhl, cf; P. Stuhl, c; Wilson and Anderson, p.

Score by innings:

Didsbury—200 101 605—9 10 10

Iricana—010 512 000—9 10 2

Mass Pessimism

Returning home for a brief vacation, United States Ambassador Dawes at London, England, describes the present economic situation as one in which the peoples of the world are suffering from "mass pessimism."

What Ambassador Dawes says is unquestionably true, but before the prevailing pessimism became general the world was suffering from a condition which as it became intensified resulted in this "mass pessimism" which he deplores and which now has a crippling effect on all efforts to improve conditions.

Without going too far afield, we find that conditions in Western Canada this year are such as to induce pessimism. Thousands of farmers and their families are in dire straits because of widespread drought conditions resulting not only in crop failures but in lack of water and pasturage for live stock. No crop in sight for 1931 and added expense in caring for livestock, following as they do upon a short crop or none at all last year, and prices below the cost of producing what may have been produced, have created an acute, desperate situation for a large section of our population. And the resultant stagnation in agriculture, with an absolute cancellation of purchasing power, has reacted adversely upon all business with the result that unemployment has become intensified in all urban centres.

Such is the situation and it would be the height of folly to attempt to deny it or seek to minimize or ignore it. Such a situation breeds pessimism, first among those who, even when everything is bright and encouraging, always look upon the dark side of any picture, those who seem to be natural born croakers and fault-finders. But just as it only requires right conditions for bacteria to multiply and spread, or for some malignant disease to develop into an epidemic, so these habitual pessimists infect others not usually so inclined but who because of their difficulties and losses are susceptible. Mass pessimism is the result.

Yet it is unavailing for it is utterly futile. It accomplishes nothing but to make the individual more disheartened and miserable than he or she would otherwise be, and to frighten and discourage others who might otherwise continue on the even tenor of their way, helpful factors in the encouragement of many and in the dissipation of the prevailing gloom.

In time of war there is no one thing which gives a wise general more concern than the maintenance of the morale of the rank and file of his army. Let morale be broken and lost and the best drilled and equipped army in the world becomes a mob. Instead of being a threat to the enemy, it becomes a menace to itself. And the most victorious of armies has to retreat sometimes. It meets reverses, temporary though they may be. It is then that morale must be maintained, when it requires to be pitched higher than ever in the confident hope and expectation of the crowning victory to come. It is only so that victory will come.

There is just as truly a morale in economics, and it is in times of depression, crop failures, falling markets, unemployment, that it must be maintained, not only by the generals and captains but by the rank and file if the nation is not to suffer irretrievable loss and possibly go down to defeat.

It is the duty of people in their own best interests to curb their pessimism. We do not say they should minimize present difficulties, because they should be frankly faced and efforts made to overcome them, but they should not be magnified. Nor should difficulties and troubles be imagined where they do not exist.

We do not believe people can pull themselves up by their boot straps, but we do believe they can refrain from stepping into quagmires. They can keep their feet on firm ground and not supinely slip into a slough of despond. And now is the time to do it.

What is this mass psychology anyway? It is simply a lack of individuality on the part of the many. A man stands on a street corner gazing up at nothing at all and soon he is surrounded by a crowd craning their necks looking at exactly the same thing. A man says times are hard and the ones to whom he says it, even though he is better off than ever before, dolefully shake his head, button up his pockets, repeat the same story, and thus help to make times hard when he would be the gainer by adopting exactly the opposite course and thus help to improve conditions.

Be an individual. Be yourself. Stand out from and away from the mass. Think and act with hope in your heart and an eye to the future. By so doing you will not be making conditions harder, you will not be discouraging others, on the contrary, you will find your own burden lightened, your own outlook improved, your courage renewed.

Shopping Psychology

They are telling the true story at the Hotel Victoria, New York, of the enterprising Seventh Ave. shoe merchant, who, after failing to dispose of a bargain batch of shoes at \$3.50 a pair, ran a dollar-day sale offering them at \$6 a pair, with an extra pair thrown in for a dollar more, closing out his entire stock in less than three hours!

First Little Girl: What's etiquette, Lutz?

Second Little: Oh, that's the noise you must swallow your tea with when there's company.

Demand For Vegetables

The increasing demand for vegetables in the diet is probably largely responsible for the rapid expansion which took place last year in the vegetable canning industry throughout Canada. The increase in 1930 was 61.8 per cent as compared with 1929. Total production amounted to 10,969,611 cans. Department of Agriculture, Ottawa.

Gladys: After I'd sung my encore I heard a gentleman from one of the papers call "Finis Finis!"

Harry: Goodness! And did you have to pay it?

Dysentery Is a Very Dangerous Bowel Complaint

Mrs. E. M. Ward, 627 Ave. H. North, Saskatoon, Sask., writes:—"When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attack three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours."

"I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

Tinned Hams From Denmark

Danish Methods Of Marketing Sets Mark That Is Hard To Beat

There is food for thought for the Canadian farmer in the recent arrival in the Canadian market of "tinned hams" from Denmark. When it comes to marketing its production or overproduction if you prefer, the little kingdom of Denmark sets a pace which is hard to beat. Not only do they market their product in all the usual forms, maintaining the dominant position in the British market, but they are now processing their finest cuts, packaging them attractively, and making a strong bid for the larger consuming centres in our own Canadian market. Canadian farmers should find an incentive to opportunity in the situation. A study of the fundamental principles underlying Danish methods might hold much of useful interest.

Health Of Children Affected

Children Of Unemployed Men In Montreal Show Effect Of Malnutrition

The effect of the economic depression on the children of unemployed men has been revealed by the health service of financial federation, conducted by the Child Welfare Association of Montreal. Ninety per cent. of the children, who are being examined at the rate of 300 a week under weight, Miss Esther Beith, R.N., director of the Child Welfare Association, stated.

One child was found to weigh 24 pounds less than normal. Lack of nutritious food has also caused dental decay and clinics conducted by the association are busy doing what they can to halt the rot. A youngster of 13 had to have her entire upper row of teeth extracted, Miss Beith said.

Conquers Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic use of smoke or fumes from the remedy prevents recurrences and often effects a permanent relief.

H.B. Trial Shipments

Nothing But Wheat To Be Shipped Over Bay Route This Year

"Nothing will be shipped out of Hudson Bay this year except wheat," said Hon. R. J. Manion, Minister of Railways. Dr. Manion had been asked the attitude of the department to requests for trial shipments of cattle later in the year.

There would be difficulties enough in making trial shipment of wheat without entering into other projects. Dr. Manion said. He drew attention to the lack of feeding facilities at Churchill as an example of the handicaps facing any attempt to ship cattle. The department had been deluged with requests of that type but all had been refused.

Ferrian Balm promotes cleanliness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caring, it soothes and relieves all roughness caused by weather conditions. Satisfactorily fragrant. It enhances the most finished appearance. Makes the skin rosier-lust in texture. Truly a perfect toilet requisite for every discerning woman.

Report Is Denied

Regina-Saskatoon Edmonton Air Mail Not To Be Discontinued

Officials of the post office department denied reports that the Regina-Saskatoon-Edmonton branch of the western air mail route was to be discontinued after July 15. It was pointed out that this story, similar to one some time ago saying all the mail services were to be disbanded, was apparently based on the cancelling of the post office mail contracts in order to give the government an opportunity to review the situation. These contracts terminate at different dates, it was explained.

German Steel For Russia

The German Iron and Steel Trust has agreed to deliver to Russia 80,000 tons of bar iron, the same amount of steel iron and 40,000 tons of steel products in the next two months at unaltered prices. The deal was arranged in Berlin by the Russian trade delegation which recently came from Moscow.

Depression Hits Icebergs

Not For Many Years Has There Been Anything Like Present Shortage

It takes quite a bit of water to make a sizable iceberg. No one who has seen one of these floating samples of the Arctic zone would take issue with this statement. One ordinary iceberg carries around enough concealed moisture to frigate a ten-acre farm all summer. Consignments of which annually proceed to the nesting grounds of the icebergs for the purpose of warming shipping of their proximity to steamer lanes have found a scarcity of them this year. Icebergographers say the situation is without precedent.

Not in a great many years has there been anything like the present shortage of icebergs in the north Atlantic. Last year 440 of these gorgeous spectacles of the sea were reported in the areas of sea travel, but this year only two little tramp bergs were located and so far away from steamship lanes as to make it unnecessary to the cowbells around their necks—Christian Science Monitor.

Ranch Will Breed Cattales

Young Buffalo Bull Shipped By B.C. Authorities To Peace River District

British Columbia's first herd of cattales, half cattle, half buffalo, are expected to result from the shipment of a young buffalo bull from Beacon Hill Park to the Peace River district. This animal is being presented by the city authorities to Mrs. Emily L. Crawford, pioneer rancher of Fort St. John, for crossing with her cattle. He will be the first buffalo liberated in this province outside a park, the Department of Agriculture here understands.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removes inflammation, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints and sore muscles.

A Good Fish Story

The season's best fish story comes from Banff Springs, Alberta. A 20-pound trout in Lake Minnewanka, yanked an angler off a pier into the water, but the fisherman held on and with the aid of a police officer and a boat finally landed the prize.

Aeroplane Prospecting

Areas in Northern Saskatchewan Will Be Investigated

The aeroplane will be employed by Professor J. B. Mawdsley of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Areas which would otherwise be accessible only with much difficulty can be readily reached by the aeroplane route. Investigation of areas of schist and greenstone presenting favourable prospects for metallic minerals will be made.

Under instructions from the Provincial Department of Railways, Labour and Industries a survey of coal and clay deposits lying north of the Saskatchewan River is also being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hasting, developing engineer. For some time these deposits have been known to exist but they have never been thoroughly investigated as to their extent, quality or commercial value.

The survey is being made with a view to developing this area if tests prove that development would be feasible.

Terrorists Are Sentenced

Mafia Terrorists in Italy Face Sentences Totalling 13 Centuries

One hundred and fourteen notorious Mafia terrorists face sentences totalling 13 centuries as a result of their conviction at a trial in Italy lasting almost a year.

Thirteen of the defendants got life, 16 got sentences of 15 to 25 years, 15 will be imprisoned ten to 15 years, and 69 will go to jail for one year. Fifty-seven others were acquitted.

The charges against the prisoners included 42 murders, 26 attempted murders, and many cases of assault, extortion, blackmail, shooting, robbery and bribery.

Zaro Agha, the ancient Turk aptly commented on the occasion of his first plane ride that he hadn't been so excited in the last 130 years.

Cunard Line's Oldest Known Living Passenger Will Make Atlantic Crossing In New Vessel

If she can make the trip, Mrs. Loring W. Bailey, the Cunard Line's oldest known living passenger, will make a trans-Atlantic crossing in the new 73,000 ton steamer now being built for the Line on the River Clyde, Scotland, the first of a pair of swift mammoth ships that will supply a weekly service between New York and ports on the English Channel, making the voyage in four days.

Mrs. Bailey made her first trip to Canada on the Cunard liner "Cambria," in January, 1848, more than 83 years ago. The "Cambria" was a side-wheeler, carried sails, and made the voyage from Liverpool to Halifax in two weeks, being delayed by rough seas followed by dense fog. Her schedule time was ten days.

Mrs. Bailey, who is now in her 90th year, enjoys excellent health and recalls with remarkable distinctness the happening of a long and varied career. She is especially proud of the fact that she is the oldest living passenger of the Cunard Line, which had its beginning in her beloved Canada, in the old gray city by the sea, Halifax, where Samuel Cunard laid the foundations of the famous Cunard Line of today with a fleet of twenty-four ocean liners plying between Europe and America.

Born Laureline Marie d'Avray, Mrs. Bailey was the daughter of Baron d'Avray and first saw the light of day on the island of Mauritius, in the Indian Ocean, off the east coast of Africa. It was then and still is one of England's sugar bowls and not a small one either.

When Laureline was five years old her parents took her from her tropical home on a journey which was to end in cold Saint John, New Brunswick, where the Baron had secured a position as Superintendent of Education in the Maritime Provinces. The journey was a long one. The family embarked on a sailing ship bound for Queenstown, sailing around the Cape of Good Hope. It took two-and-a-half months to reach the Irish port, their ship passing but one steamer on the entire voyage.

After visiting London and Northern France the d'Avrays set out for Liverpool, where they embarked on the "Cambria" for Canada. Landing at Halifax in mid-winter, Laureline saw snow for the first time. She thought it was salt until she tasted it, but could not understand why it was so cold nor why it quickly melted in her warm fingers.

In travelling from Halifax to Saint John the family passed over the Cobequid Mountains, in Northern Nova Scotia. In a rude covered wagon, which was drawn for more than a hundred miles through the frigid country over glaciers, railroads had not yet made their appearance in that part of the country.

The girl's father was very successful in his new post and won promotion until he held the chair of modern languages in King's College, now the University of New Brunswick.

It was while living at the college that Laureline met and married a young professor who had come from Harvard, Loring Woot Bailey, who afterwards became famous as a scientist, and who was designated as a charter member of the Royal Society of Canada by the Marquis of Lorne. Dr. Bailey's service at the University extended over 47 years.

For many years the Baileys spent their summers at Fredericton. It was here that they celebrated the silver and golden anniversaries of their wedding.

After the death of Dr. Bailey at

the age of 86, Mrs. Bailey moved to Halifax, the scene of her first landing in the New World. Here she was a guest aboard the Cunard liner "Annia," when that giant ship docked at Halifax on July 4, just 91 years after the first Cunard, the "Britannia," set out from Liverpool, a pioneer in the world of modern shipping.

Recently in speaking of the Samuel Cunards, Mrs. Bailey said: "I knew the Cunards when they lived in Chatham. They used to visit Sheriff Woolhouser in Fredericton. Mrs. Cunard gave me a small statue, about one finger high, when she left Chatham for England. I still have it."

Fox Feeding Guide

Keeping In Step With Season Found To Bring Best Results

The way to keep in step with the season is the key to ensure best results in fox feeding, studies in this respect at the Experimental Fox Ranch of the Dominion Department of Agriculture at Summerside, P.E.I., show. The report for 1928, 1929 and 1930, just issued states: "It is absolutely necessary that foxes should be fed in step with the season. When the earth is covered with green vegetation foxes require that vegetation, or the essentials of it from animals that have recently been eating it; during the fall months when ripe vegetation is prevalent foxes require that ripe vegetation. In the late fall months when frost has destroyed vegetation and the prey of the foxes is in good condition foxes require a high meat ration. When the prey of the foxes is in poor condition and the vixen and her prey are often snowed in, foxes do not require a large amount of food."

Milk a Bone Builder

Another Good Reason For the Liberal Use of Milk

Scientific research finds another good reason for the liberal use of milk, especially in the diet of the growing child, and that is in its capacity as a bone builder. The human body contains more calcium than it does any other mineral, and the best and cheapest source of supply is milk. Dietetic experts assert that a quart of milk daily ensures the growing child of the best source of calcium for the manufacture of bones and teeth. It is equivalent in calcium content to large oranges, 30 large helpings of cauliflower, 24 helpings of carrot, 32 eggs, or 20 pounds of beef.—Department of Agriculture, Ottawa.

Speeds Ripening Of Tomatoes

"The farmer doesn't very often get a chance to feed Jack Frost, especially on a soft crop like tomatoes, but experimental work at Morden, Man., by the Dominion Department of Agriculture shows conclusively that this can be done. With the advance of the season tomatoes ripen more slowly and the use of ethylene gas speeds up the process from late August on. Fruit in danger of frost damage can be picked and quickly ripened by the use of this gas."

The Republic of Andorra, a small country lying between France and Spain, pays its President a yearly salary of \$15.

Would Increase Value Of Fish Industry

Fish Flour Is New Product Not Yet On Market

From \$500,000 to \$1,500,000 annually may be added to the value of the fisheries industry of the country by the development of "fish flour," Henry O'Malley, Commissioner of the U.S. Bureau of Fisheries says.

Produced from the solid parts remaining from the filleting or packing of fish, the new product is dried and ground into a fine meal with a pleasant taste, odor and fluffy appearance. The new flour is more highly refined than the fish meals used for feeding mammals, and in cooking may be easily disguised to make the fish taste unrecognizable, Mr. O'Malley said. At present the flour is not available commercially.

Provided the public takes to the new product, there is a potential production of 20,000,000 pounds of raw material available, it is estimated. Much interest has been shown in the work of developing the flour by national manufacturers and distributors of bakery products and specialized feed products.

The bureau has succeeded in making very edible fish flour cookies, mixing the new type with the old-fashioned wheat flour and covering "fishy" tastes with cinnamon or ginger. It is said that the flour can also be used successfully in thickening fish soups or chowders and in the manufacture of salt crackers. Its use in bread has not been tried by the bureau.

Only the surface of the possibilities of developing this new product for human food has been touched, according to J. R. Manning, technologist of the Fisheries Bureau.

A Nation Of Fruit Eaters

Average Per Person In Britain Last Year Was 83 Pounds

British people are rapidly becoming a nation of fruit-eaters, according to the Empire Marketing board's report on fruit supplies in 1930. "Last year more fruit was eaten in the United Kingdom than in any previous year," states the report, which mentions that the average consumption was 83 pounds for every man and woman and child. This was an increase of 12½ pounds per person over the previous year.

A pleasing feature of the report is the statement that a higher proportion of the fruit imports was supplied by the Empire last year than previously. Nearly 62 per cent. of apples, 40 per cent. of the bananas and more than half the peaches were Empire-grown.

Revealing Old Secrets

Settlements Of Olden Times Being Discovered By Aviators

Secrets of antiquity that have remained hidden for centuries are today being brought again to the knowledge of men by the aeroplane. In Britain, the Middle West, and other historical regions throughout the Empire an air-borne camera is revealing details of towns, settlements and walled cities of olden times that are assisting archaeologists mightily in their reconstructions of the world as it was fifteen, twenty or more centuries ago.

For a long time, Egypt was the chief granary of the Roman Empire.

Long distance racing matches for homing pigeons date back to 1818.

Plea Is Made For Retention In Canada Of Able Men To Carry On Important Research Work

Keeping Up Vitamin Supply

Diet Of Milk, Meat, Eggs, Vegetables and Fruits Is Very Helpful

Medical science still knows comparatively little about the necessities and supply of vitamins, although it recognizes that they "produce profound changes in growth," Dr. F. E. Tisdall, of Toronto, declared in a scientific session of the Canadian Medical Association at Vancouver.

"Everyone in the world seems to know all about vitamins but the medical profession," he remarked. After demonstrating by slides the results of experiments with vitamin diets, he concluded by stating that as a practical application of what is known, a diet of milk, meat, eggs, vegetables and fruits, should go a long way in supplying the essentials to proper nutrition.

Fifty per cent. of our diet today is made up of refined flour and sugars, he said, which is lacking in vitamins and almost lacking in proteins. The problem lies in seeing that the amounts necessary to make up for this deficiency are found in the remainder of the diet.

"The deficiency of a vital element cannot be made up by taking an excess of another," he added. Experiments had proved this. It has also been demonstrated that when fed on special foods children had reached greater growth than those fed a "normal" diet.

The difference in the vitality between the Oriental and the Occidental people had been traced by an authority, he said.

At least ten minerals are essential to life, said Dr. Tisdall, but all except three are found in sufficient quantities in our normal diets. The three are calcium, iron and iodine.

Weaning Young Pigs

Natural Weaning Has Been Found To Bring Best Results

Natural weaning gives best results with a litter of young pigs and to obtain this, feed suitable for young pigs should be provided in the creep. A good mixture for the purpose is a half and half combination of middlings and finely ground oats from which the hulls have been sifted. Young pigs will start to nibble at the feed at about two to four weeks of age, and by the sixth or seventh week should be eating quite freely. Under such a procedure shock incidental to more abrupt methods is overcome and weaning develops as a natural event.

Pamphlet 135 N.S., Department of Agriculture, Ottawa.

Keeping Cream Fresh

Studies in keeping cream sweet with a litter of young pigs and to obtain this, feed suitable for young pigs should be provided in the creep. A good mixture for the purpose is a half and half combination of middlings and finely ground oats from which the hulls have been sifted. Young pigs will start to nibble at the feed at about two to four weeks of age, and by the sixth or seventh week should be eating quite freely. Under such a procedure shock incidental to more abrupt methods is overcome and weaning develops as a natural event.

For a long time, Egypt was the chief granary of the Roman Empire.

Long distance racing matches for homing pigeons date back to 1818.

Need for a better understanding of the significance of and necessity for research was urged by Dr. H. M. Torsy, president of the national research council, Ottawa, Ont., addressing the Canadian Society of Technical Agriculturists, in session at Guelph, Ontario. He advocated more co-operation between scientific men.

A plea for the retention in Canada of able men was made by Dr. Torsy, who deplored the circumstances which led to the best brains leaving the country.

"You can't make a first class country with second class men," he said. "We must hold onto our best brains. We have material out of which to make leaders for every activity to be found in Canada," he stated in an address in which he traced the development of national research movements throughout the world.

Production costs will strike a level that will help to stabilize land values, said Dr. O. C. Stine, president of the American farm economics board, who also spoke. While the next two or three years might mean a great deal of suffering to producing countries, he said, the outlook now is brighter than it was a short time ago.

Growth of the organization during the past year was reported to members by W. T. Macoun of Ottawa, in his presidential address.

Mr. Macoun emphasized the fact that three new branches of the organization had been formed during the year, and reported increased activity in all departments of the society's work. He urged the members to pay more attention to the average man and suggested extension work of the C.S.T.A. be increased in the future.

Egg Consumption Is High

Per Capita Consumption Of Eggs Higher In Canada Than The U.S.

Prof. J. V. Rice of Cornell University recently called attention to the Canadian per capita egg consumption which is shown as 28.8 dozens, whereas that for the United States for the same year is shown as 16.7 dozens. While these figures are for 1925, as the figures from the most recent United States census have not as yet been made available, they show that Canada increased her per capita consumption from 35.1 dozens in 1901 to 26.8 dozens in 1925, and to 30.8 dozens in 1929, whereas that for the United States has hovered around the 16 dozen figure for some 30 or more years.

The editor of a produce journal in the United States comments as follows: "It would seem that the Canadian figures would give a fair answer to the question as to whether or not our increasing production of eggs can be disposed of by increasing consumer demand. No doubt, more careful standardization of quality will have some effect upon consumption but it will take, as well, considerable additional effort to bring our per capita consumption up to the same level as that in Canada."

Cattle For British Market

Twenty-seven cars of pure bred cattle arrived in Winnipeg from further west the other day en route to the British market over Canadian Pacific rails. This is the seventh shipment of the kind from Western Canadian ranches since last October.

ENGLISH ROWING BELLES COMPETE ON THE CONTINENT

Above are seven members of the rowing crew which will represent Great Britain at Lucerne, Switzerland, at the international rowing regatta. These girls will compete against crews of German, Belgian and Swiss girls in several events.

"You annoy me from morning till night, Minnie." "Impossible, madam. You are not up till mid-day!"—Flögele Blätter, Munich.

J. R. G. VIDEN, Editor & Manager

The need of a lock-up here was emphasized this week when Hawkes' Store was broken into. The culprits were caught during daylight hours when the constable could get assistance in watching them, but had they been caught at night, he would have been in a position of not having any place to put them. Constable Jarman says a lack of a place to put prisoners hampers the work of the police officers and may at any time put them in a perilous position.

Hunting Season on Water Fowl Is Reduced One Month

Conservation Measure Announced
May Halt Shooting in 1932.

Water fowl hunting regulations for Alberta were made public on Friday by Provincial Government authorities, the new change in the regulations being the shortening by one month of the shooting season. This is being done in an effort to conserve the game.

South of the Clearwater and Athabasca rivers the open season for ducks is from noon of September 15th to November 14th inclusive.

Bag limit for ducks is 15 per day during September and a total of 25 for the balance of the season, with a total of 100 birds for each hunter per season.

Geese Limits:

The bag limit for geese is 10 per day for each hunter, with a total of 30 for the whole season.

The shortening of the season and reduction of bag limits was brought about with a view to conservation. Manitoba and Saskatchewan have made changes along the same lines. There is also a movement in the United States to cut still further to a 30-day season with a reduction in bag limit.

As a result of this general movement in Canada and the United States, it is possible that consideration will be given to further reductions and it is also possible that water fowl hunting will be closed for the entire 1932 season.

84,000 Alberta Motor Licenses

Half-price on Motor Licenses on August 1st. Many Farmers Using Only Trucks This Year.

Approximately 81,600 motor car licenses were issued by the provincial secretary's department for the first half of the year. Up to June 30 there had been about 73,000 passenger cars and 11,000 trucks thus accounted for and making a total comparing remarkably well, the conditions considered, with the corresponding period of last year.

It is expected that the 1931 total will come close to the 100,000 mark though there has naturally been some decrease in the first half of the year. The total figures for 1930 were 100,135, made up of 85,067 passenger cars and 15,068 trucks.

In explanation of such drop as

LOCAL & GENERAL

Motor fuel at pump 5 gallons; \$1.00 - Roger Barrett.

Mrs. E. V. Woodcock is visiting friends at Delacour this week.

Mr. and Mrs. Weeks and Mr. and Mrs. Tilley, of Crossfield spent Sunday at the home of Phil McNeil.

Mrs. J. Fleury who for the past month has been ill, is now able to be up and around again.

Mr. and Mrs. Harold Clement, of Edmonton, returned home last week-end after spending a two weeks vacation with their parents here.

Charlie Cook and Ward Wyman played with the Trochu ball team in a double-header against Neerine on Sunday. Trochu took both games.

A. R. Kendrick shipped a large quantity of coarse grain recently. This week he shipped two cars of oats and one of barley.

Dr. F. A. McEwan, V.S., formerly of Red Deer has located at Didsbury and until further notice may be found at the Rosebud Hotel.

Mrs. W. H. Chamberlain and Florence are visiting Mrs. Chamberlain's mother and sister at Edmonton.

Now ready - Scratch pads at the Pioneer Office, 2 for 5 cents. Just handy for the telephone, store and school.

Misses Minnie, Florence, Jean and Phyllis McNeil returned home after spending a two weeks holiday at Crossfield.

English Watches, Grandfather Clocks, and Chimes. Everything Ancient and Modern. Bring it to W. Monteith, North End Jeweller.

A new shipment of ladies silk voile dresses. Also children's dresses from 6 to 14 years. All millinery at reduced prices. Mrs. Wilson's, Main Street - Advt. (30)

A General Hospital for sick Watches, Clocks, Phonographs, Sewing Machines, Etc. Etc. In front corner of Club Launch. All work guaranteed - Advt.

"The Learned About Women" at the Opera House Thursday next. Song hits galore and a thousand laughs. You'll never stop howling 25c to everybody.

Mr. and Mrs. S. T. Halton and family, of Lavoey, Alberta, who are on route for Waterton Lakes, spent the week-end with Mr. and Mrs. J. W. Halton.

Lon Chaney's big feature talking picture "The Unholy Three," will be presented at the Opera House, tonight (Thursday). An outstanding picture at the regular price: 25c to everybody.

Mr. M. H. Halton who was the Alberta I.O.O.F.E. student at Oxford University, has recently returned and was visiting his brother, Mr. J. W. Halton last week. He will leave shortly to take up a position with the Toronto Daily Star.

Walter Edmundson was badly burned Tuesday afternoon last when his oil truck caught fire as he was unloading gasoline at Williamson's Garage. Mr. Edmundson was busy filling the underground tank at the garage when the hose suddenly burst into flame. In trying to disconnect the hose from the tank he became splashed with gasoline and in a moment was all afire.

-CARLSTADT NEWS

Tax Reduced.

Cheques of five dollars and under are exempt from the stamp tax by an amendment of the War Revenue Act adopted in the House of Commons, July 27th. The amendment was proposed by the government. Ordinary postage stamps may be used on cheques instead of excise stamps used for this purpose. This last item of information was received by our local postmaster last week.

There has been to date, it is pointed out that quite a large number of farmers in different parts of the province who ordinarily operate a passenger auto and truck each, are this year operating the truck only, making it serve a dual purpose and leaving the passenger car to be for easier times. This, of course is an economy measure which is reflected in the net issue of licenses.

WARNING.

ANYONE found breaking fences at McMurray's Swimming Pool on the Dog Pound will be prosecuted to the fullest extent of the law.

If fences are found broken after this notice all swimming will be stopped and trespassers prosecuted.

D. McMURRAY,
July 30th.

The Lure of the Maritimes

makers from all parts of eastern Canada and United States. Their many sea-side resorts; quaint and beautiful little villages and snug towns dotted along the Bay of Fundy have a special attraction for those who wish to combine comfort with scenic beauty; golf and a wide variety of other sports with fishing and sailing; and the whole with modern and direct transportation.

St. Andrews-by-the-Sea with its well known and excellent Argonaut Hotel. There, as at its more famous namesake in Scotland, is to be found one of the outstanding 18-hole golf courses in Eastern Canada where many a hard-fought championship has been decided. Again, take victory on the Bay of Fundy. Set in one of the most beautiful, old-world scenery

in Canada, the Pines, recently opened hostelry, offers a wide range of entertainment including tennis, golf, sailing, fishing, hiking, horseback riding, motoring, swimming either in the sea or in the salt water pool with its leisurely glass windscreen and promenade for spectators nestling under the veranda of the hotel. Good motoring roads give access to scores of quaint little villages, some of them, in the Evangeline country, scenes of historic incident and tragedy. Here too, the modern tourist will often meet the old-world ox wain taking its leisurely way down the country road. Lay-out shows hand-spring drive into the Pines Hotel pool; Evangeline country, shooting, church and statue at Grand Pre; and section of course at St. Andrews.

The Maritimes hold a proud and well-earned place in tourist popularity as well as being a favorite territory for holiday-

Made in Canada

WORLD HAPPENINGS BRIEFLY TOLD

The will of Dr. H. H. A. Buhner, a dentist of York, Pennsylvania, provides that all bills due him for dental work be cancelled.

During 1930 Canadians spent \$200,000,000 on alcoholic beverages and \$50,000,000 on cigarettes—more than the annual premiums on the entire amount of life insurance in Canada.

Alfred Aloysius "Truder" Horn, co-author of the book "Truder Horn," died in a hospital at Whitstable, England, after a brief illness. He was 78 years old.

The Vimy Ridge War Memorial will not be ready for unveiling before 1934 or 1935. Hon. D. M. Sutherland, Minister of National Defence, told the House of Commons.

Without any discussion a bill authorizing a loan of \$300,000 to the Harbour Commissioners of New Westminster, B.C., was given third reading in the House of Commons.

General Ebert Williams, 29, who was shot down while flying over the German lines on the morning of Armistice Day, died at Bournemouth, England, of injuries sustained in an auto accident.

Mahatma Gandhi has been designated by the government to represent the Indian Nationalists on the federal structure committee of the second round table conference, which meets in London, England, September 5.

Recently appointed to the Maritime and western Ontario command, Royal Canadian Mounted Police, superintendent Richard Field arrived at Winnipeg from Dawson, Y.T. He succeeded Supt. A. B. Allard, who was transferred to the Yukon post.

Grad fifteen and a half miles south-west of Nelson, across the Kootenay River, and a flag station on the Canadian Pacific Railway on the Nelson-Bossard Branch, may become the new home of the Sons of Freedom, if efforts now being put forward by the province meet with success.

Post Offices in Canada

Canada has 12,427 post offices, an increase of 18 since last year, and of 180 since 1922, was the reply given by Hon. Arthur Saupe, postmaster-general, to a question asked in the House of Commons. Rural mail centers throughout the country number 4,226.

The average sackless driver comes quickly before the post's aid. "A perfect woman, newly planned, to wait, to comfort and command."

Young Mattison has a fond-spacer in the room and even evening he goes out leaving it on.

Mattison: "I hear snoring in Master Mattison's room. Go and see when he is in there."

"I don't retch him." "There is only the snore there. It is talking to itself." Kasper, Stockholm.

W. N. L. 1897

Demand For Livestock

1,300 Head Of Cattle Purchased By Saskatchewan Farmers Under Government Plan

A marked increase in the demand of Saskatchewan farmers for live stock is indicated in the records of transactions under the Saskatchewan Live Stock Purchase and Sale Act, during the 1930-31 fiscal year, now being compiled by the Live Stock Branch of the Provincial Department of Agriculture. Exclusive of feeders, which were handled under a different option, approximately 1,300 head of cattle have been purchased by Saskatchewan farmers under the provisions of the Act during the fiscal period referred to, this being the largest number in any year since 1919. In addition, 250 bulls were purchased, the largest number since 1922. British demand for sheep and swine also is noted, the 3,500 ewes purchased being more than in any year since 1918, and the 1,600 sows being four times as many as in any previous year.

Phone Call From England

First Trans-Atlantic Conversation By All Canadian Route Between England and Saskatchewan

For the first time in history a direct conversation was recently carried on between England and western Canada when Colonel A. S. Angwin, supervisor of wireless of London, England, called his sister, Mrs. A. G. Standish, of Lough, Saskatchewan, the call coming via beam wireless to Montreal. The first words to western Canada and thence by telephone to Perdue, were spoken by the postmaster-general of England, who stated that this was the first time England had spoken directly to western Canada through an all-Canadian route and inquired as to the reception. The call lasted about ten or twelve minutes, the entire conversation coming over clearly and distinctly.

Edmonton Industries

Some 564 Commodities Now Being Manufactured In Northern City

Some 564 commodities are manufactured in Edmonton, according to the latest figures. Chief among these are men's clothing, for garments, women's and children's wear, iron, steel and sheet metal products, wire, fences, furniture, brooms, biscuits, beverages, lumber, window shades, doors, boxes, cement, brick, paper cartons, floor boots, canvas, candles, shoes, cabinets, chairs, auto accessories, signs, packing house products, dairy products, mattresses, neckties, scarves, paints, plows, soap, springs, stoves, toiletries, aerated waters, wool, violins, and vinegar.

Will Use Historic Form

World's Poultry Congress In Italy Will Have Unique Setting

The historic forum which Trajan built about 115 A.D., will be used to house exhibits for the fifth world poultry congress in Rome, Italy, next year. Arrangements making this possible have recently been completed with the Mussolini Government, according to advice received at Ottawa by P. C. Kford, Canadian poultry husbandman. The forum, known to-day as the market place of Trajan, was one of the brilliant architectural accomplishments completed during the reign of Emperor Hadrian.

May Consult Canadians

Mexico Would Ask For Advice In Connection With Their National Railways

It was stated in official quarters that General Juan Andres Almazan, Mexican secretary of communications, who is at the Mayo clinic at Rochester, Minn., would meet Canadian railroad officials in New York City soon for a conference in regard to the Mexican National Railways. A commission of Canadian experts, en route to Mexico at the government's request a year and a half ago and made a thorough study of the condition of the Mexican lines.

The claspings of Mother Goose, Western Explorer puts it within reach of all and it can be got at any drugstore.

More than 7,500 varieties of toy soldiers with the uniforms worn all over the world for 2,600 years were exhibited at the Leipzig Fair.

A Provincial Pleasure Resort

The Opening Function Of Lake Manitou Provincial Resort Attracts Great Gathering

Saskatchewan, making a definite bid for its preeminent share of the approximately \$300,000,000 spent by tourists in Canada annually, has supplemented its aggressive all-weather road policy by establishment of one of the most unique and attractive tourist and family resorts in the Dominion.

On July 4, Hon. J. T. M. Anderson, Premier of the Province, officially opened Manitou Lake Lodge, the central building of the camp site which is located in the Provincial Park which flanks the shores of Little Manitou Lake, renowned for the medicinal properties of its waters.

Hon. J. A. Merfield, under whose direction the project has been conducted, and other members of the Cabinet, as well as a considerable number of Canadian journalists, who were attending their annual convention at Regina, were present. There was a great gathering of people from almost every part of the Province and from outside points, and the occasion was in every respect a gala one.

This marked the establishment of a Provincial Summer resort, converted from a portion of a great prairie region, delightful in its natural beauties, providing good accommodation, and meeting all the requirements desired by those seeking rest and recreation.

Re-establishment is part of a Provincial programme to show the people of the Province, that after spending their working days at home, they do not need to seek their rest and

recreation abroad. Saskatchewan summer days are long and fair; natural beauties are many and varied, and there is no need to look elsewhere for holiday grounds.

So to the journeying at Lake Manitou this season, it will be pleasant to contemplate many of the facilities which minister to their pleasure and comfort, in their recreation finding a sorely needed work and wages to many a bread-winner. That perhaps was the keynote that prompted the development of the resort.

Manitou Lake which lies close to the town of Watrous on the Canadian National Railway, is a lovely scene in the midst of a wide region of level prairie between the northern end of Lake Mountain Lake, and the South Saskatchewan River. It is the natural "Spa" of the Province and the summer resort for the people of a wide extent of the Prairie country.

It occupies a mild valley with neither hot nor cold winds, and its scrutable movement of nature has caused it to be scooped out of the surrounding plain. The banks are covered with a lovely woodland verdure, and slope away to fine sandy beaches at the water's edge.

The waters of the lake, which change their colours as the quick cloud shadows sweep across their surface, are ideal for swimming, boating, and summer sports. From time immemorial the Indians believed they were endowed by the Manitou with healing virtues, and many a wilderness caravan bringing sick and suffering to seek relief, halted by the banks.

Now was this an idle belief. Science declares that the waters of this lake may have a real value in skin and rheumatic afflictions. Remarkable cures have been ascribed to bathing and bathing.

Stated as it is, not only convenient, but to railway transportation, but on the highways, which make it easily accessible from Regina, Moose Jaw, Saskatoon and other prairie points, and possessed of almost every qualification for summer holidaying, it is not to be wondered at that this Provincial Park is rapidly becoming the Mecca of summer vacationists from all over the province. The Provincial Government realizing this, last winter so arranged a portion of its summer vacation programme, in order to do something by art to what nature has already done to the place. The first object was to relieve unemployment and the second to develop Manitou Lake and its surroundings as a Province of the future.

With these ends in view much work was done during the winter and spring.

There are about thirty acres, originally thickly wooded with the graceful native poplar. Men were set to

work to clear roads and paths and camp sites. A picturesque lodge has been erected, almost entirely of native material and sixteen excellent cottages built. The collection of the stones for the building afforded much needed employment for farmers with their teams from a wide district. In many cases the objects were served the furtherance of the work on hand, and removing the stones from the building was a very great facility.

The Lodge and the cottages are hatched with rushes from a small bay of the lake. They were cut after the water had frozen, when the farmers harvested them by means of mowing machines driven over the ice. They were then sorted and tied in bundles by men experienced in such work. It was discovered that there were a number of men among the unemployed from Ireland and elsewhere, who were experienced thatchers, and these men were entrusted with the roofing work. Not only has a picturesque roof been achieved, but the thatch is proving to be both serviceable and economical.

The lodge is equipped with modern conveniences, including running water and electric light, and there is a kitchen and light in all the cottages. A cooking kitchen 51 feet long by 8 feet wide has been built for the convenience of cottager and camper, and its longitudinal plan provides accommodation for many summer cooks without conflict in their operations. A great deal of work has been done in clearing roads, and in making winding and attractive paths through the woodland groves. Convenient camp sites have been prepared with flat camping space for the tent, and

parking ground for the car. The arrangements in connection with the sites are handled from the Lodge.

The exterior view of the Lodge is picturesque and attractive. Built entirely of native stone the walls rise from a terrace surrounded by a stone enclosure, furnished with stone electric light standards in the middle and at the end. Cement steps lead from the roadway to the main entrance, a massive stone arch opening upon a spacious vestibule. From the vestibule an arched doorway leads to a wide and airy rotunda with a fine stone fireplace. On the east wall there are two stone electric light standards, and on the west side a staircase leads to a gallery which encircles the whole rotunda. On the second story there are ten rooms for the accommodation of guests. At the west end of the Lodge on the ground floor, there is a den with built in fireplace, and some private suites.

The east end is also divided into suites. An attractive rock garden has been prepared at the front of the lodge. A fountain has been built, and the slope leading to the main entrance terraced. A flagstone walk bordered with native stone leads from the lodge to the beach, where there is a stone pier. The slopes surrounding the lodge have been artistically terraced, and six and a half miles of stone bordered crescents for one way traffic have been laid out. The entire area of the Park has been circled by a broad path, cut and rock bordered.

The work at Manitou Park was in the main used as a centre to provide employment, and to provide for people from a very wide extended district. Practically all of the teaming, and the work was done by farmers of this class. Approximately 200 men went through the project, and it was designed to be as equitable as possible. About 70 per cent of the workmen were from the farms, and a number of them lived at home and were enabled to go to and from their homes. Some of the workers from distant points, and those unable or too far away, to return home each evening, were housed at the Provincial Hotel. There were about 105 workers of this latter class employed.

About \$50,000 was disbursed in this way, half of which was paid by the Federal Government, and the other half by the Province under the unemployment arrangement. Practically the only portion of this sum spent outside the Province for material went for hardware and cement.

There is a fine spring of fresh water which wells out of the hillside and which has made possible an ample supply piped into the lodge and

Keep Free From Fat-Feel Younger

Unlike most salts, Kruschen isn't simply a laxative. It's what all you want any kind of salts with any flesh habit will do just what you want.

When you take Kruschen Salts you not only stimulate your bowels, but perfectly, and you supply every internal organ, glands, nerve and blood in the body with nature's own revitalizing and rejuvenating minerals. Get a lot of Kruschen Salts at any drug store—take one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—in just a few days indolence changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been feeling right along. You have fattened the secret of flesh reduction."

cottages, and is available for the use of the campers. A scientific system of septic tanks and sewers for the sewage from the lodge in a modern and hygienic manner.

Each beach is delightful for bathing and swimming. The slope to the depths are gradual, and there is little risk to the children, who delight to paddle along the shore.

The waters are buoyant and pleasant for swimmers, who require little effort either for support or propulsion. The swimming is a pleasure. The buoyant qualities of the water are really remarkable, and bathers suffering from rheumatism and other ailments find few immersions, and they have disappeared as if by magic.

There are boats available, and during the season, a merry laughing throng, are invariably engaged in aquatic sports. A surf board, towed by a motor boat is a popular sport, and it is the very poetry of youth, to catch a hand-on a girl erect upon a surf board coursing through a cloud of spray.

The beach is a wide expanse of sand, where the devotees of the "ancient and royal game" may banish nibble and driver, and cry "fore", to their heart's content.

The Northern Seaport

Plans For the Development Of The Townsite Of Churchill

Plans for the development of the townsite of Churchill, seaport of northern Manitoba and terminals of the Hudson Bay Railway, call for the construction of a modern town, with central heating, fireproof public building and semi-fireproof residences, boulevards, parks and squares.

Constructed under a town planning system, approved of by Hon. Donald C. McKenzie, Provincial Minister of Mines and Natural Resources, every facility of a modern town will be provided. The townsite will be ready for settlement next year. No property will be sold, but it will be disposed of in 50-year leases, subject to revision every five years.

Churchill will be blessed with wide streets for through traffic, protected residential districts and generous space for recreation. All streets, parks and squares will be named after early explorers and heroes of Canadian history.

Good Poultry Record

Performance Of R.C. University Rhode Island Reds Is Attracting Attention

Professor E. A. Lloyd, head of the poultry department of the University of British Columbia, states that the members of the University's family of Rhode Island Reds have already averaged over 100 eggs in their second year and give promise of exceeding an average of 200 before the fall. Such production has never been recorded in any strain or breed anywhere in the world, he said. There are eight birds in the family.

The inventor of a new riveting machine claims it is useless. We hope his turns his talents next to patent little and celerity.

Mountain View Notes

Mrs. Mosley and family and Mr. Jack Steele were visitors at Kiever Lake on Sunday.

Mr. and Mrs. B. A. Atkinson were visitors at the home of Mr. and Mrs. Bookless, at Bowden on Sunday.

A resident of the district reports that ladies to the north of us have as many as fifty quarts of Saskatoons preserved. The berries however are not so plentiful as last year, but seem of a larger variety.

Didsbury Fair attracted a large attendance from our community. The residents taking a keen interest in the fair and many deserving credit for their display of exhibits. Messrs. Hugh Roberts and B. A. Atkinson won prizes with their Holstein cattle, while Mr. Harold Fright took several prizes with his Barred Rock poultry. Mrs. Max Woods took a first prize with her fattest centre-piece.

On Saturday evening a big shower was given in Community Hall in honor of Mrs. Raleigh Finlay (nee Lily Olsen) whose marriage took place recently. A mock marriage was performed and the bride received many beautiful and useful gifts. After the shower, the Olds orchestra supplying the music, everybody danced until their time. All the community wish Mr. and Mrs. Finlay a long and happy married life.

DIDSBURY

Didsbury, town of the golden west, Pride of the prairie, home of the best. Give me a home in Didsbury town, Dear old Didsbury town.

Here we saw a first class fair Which made everybody stare. Cattle, horses, sheep and grain. Showed we get our share of rain.

Flowers, poultry, cooking, sewing. Certainly made creditable showing. Thisgo-ahead town on the C.P.R. line is in the limelight bound to shine.

—ORIGINAL.

Melvin Notes.

Miss Florence O'Brien visited Miss Nita Wilson Tuesday.

Mrs. A. Esler and Kenneth are spending the week with Mr. and Mrs. A. Krebs.

Mr. and Mrs. G. Carlson, Gladys and Doreen Farrant are spending their holiday at Sylvan Lake.

Mr. and Mrs. Lawrence Chandler spent Sunday with Mr. and Mrs. Lloyd Charler.

A little baby girl has come to stay at the home of Mr. and Mrs. O. Krebs. Congratulations.

We also congratulate Mr. and Mrs. A. Konschuh on the arrival of a baby girl at their home.

Mrs. P. Johnston, Marion and Mrs. G. Johnston visited with Mr. and Mrs. J. Good Tuesday.

Several of our boys went fishing Saturday and it wasn't all fish stories they brought back.

We hear there was a stampede and cattle-riding exhibition held north of our district Sunday.

The Knock-Outs played a game of softball east of town Sunday afternoon with the Bunting Biffers. Score 14-21 in favor of the Knock-Outs.

Messrs. R. Honey, Lyle, Dave Jensen and R. Cunningham have all gone to seek homesteads in the Peace River Country. They report everything as being beautiful and the roads good.

Several from our district attended the W.L. convention at Carstairs Monday. It was the largest conference District No. 3 ever had, everyone seeming in good spirits and a lot of business being done. Mrs. Hosegood was again elected constituency convenor.

BAPTIST CHURCH—WESTCOTT

Rev. Harry Young the Scottish evangelist is holding services every night this week except Saturday at 8 o'clock in Westcott Baptist Church. Concluding service on Sunday evening at 8 o'clock.

Burnside Notes

Mrs. Walter McCoy is visiting her parents, Mr. and Mrs. Sheils.

Mr. and Mrs. Jarman and family, of Crossed spent Sunday at the A. E. Thompson home;

Miss Mildred Cippelley spent this week with Miss Helen Pross at Mr. Albert Spragg's.

Mrs. Mackie, of Arrowwood spent this week with her sister, Mrs. Joe Clarke.

Mr. Lewis McCulloch who has been employed at Taber oil wells is holidaying at his home here.

Miss Sadie McLean and Mr. and Mrs. H. Fisher visited Pine Lake last week-end.

Messdames Jenkins, Mardon, Pross, Eckel and Misses H. Pross and M. Cippelley attended the W.L. conference at Carstairs, Monday.

Miss Gertie McLean spent a few days in Calgary when she accompanied her sister on her return to her post at the General Hospital.

The W.L. will meet at Mrs. Eckel's August 12th. Miss M. Cippelley will take the topic "Labor-saving devices on the Farm." Roll-call will be answered by "Short Cuts in Housework."

The softball game Saturday between Lone Pine was tied because of darkness. Snappy ball was played by both sides. Lone Pine also played a baseball game with Community Hall, the latter winning by 8-3. Both teams have won a game, the Hall losing to Lone Pine two weeks ago by 9-8.

Community Club will hold a picnic at Lone Pine Hall Friday, Aug. 14th. 3 ball games, horseshoe tournament and all kinds of sports in the afternoon. Bellamy's orchestra provide the music for the dance at night. Last picnic of the season. Everybody come early and enjoy a good afternoon.

Westcott Notes.

The July meeting of Westcott W.L. was held at the home of Mrs. Ed. Klinek. A paper was given by Mildred Levanog dealing with the need of our schoolchildren for good books, good lectures and good music. Arrangements were made for the baby clinic which is being held at Mrs. Ed. Klinek's on September 15th. The social side of the meeting consisted of recitations by Marjorie Newton and Mrs. Sheldon Owens and musical selections from "Tales of Hoffmann." The meeting concluded with the singing of the National Anthem after which the hostess served lunch.

FOOTBALL.

In a cup game at Bowden on Saturday evening last, Didsbury with a weakened team owing to injuries and absences put up a gallant fight, but were beaten 3-0.

The first half was pretty evenly matched, Bowden scoring one goal. In the second half the home team applied pressure and scored two more goals. In the final stages the visitors were mainly on the defence.

Bowden who are champions of the Rosebud League play at Didsbury this Saturday evening in an exhibition game at 7.30. This game should be worth seeing. Admission 25c.
